

New for 2008 Audiopipe has released its latest addition to the line the APF series of flat amplifiers.

Featuring an ultra slim design allows for both the 2 and 4 channels to be mounted in applications where space has been limited due to height restrictions. Other features included are a full variable low/ hi pass cross over, a super bright white LED illuminated cooling fan, extended bass knob and a low level RCA output for adding an second amplifier.

For more exciting features or pricing visit your local Audiopipe dealer or log on to WWW.AUDIOPIPE.COM
